

■ \$BAGUETTE

THE MOST RECOGNIZED OBJECT IN THE WORLD

UNESCO Heritage 2022 · Zero Tax · 100% Community · Solana

Official Whitepaper v2.0 | Launch: June 7, 2026 | Platform: Pump.fun

1. VISION & NARRATIVE

\$BAGUETTE is not just a memecoin. It is the digital symbol of French culture — eternal, universal, and recognized by 8 billion people worldwide. The baguette was recognized by UNESCO as Intangible Cultural Heritage of Humanity in 2022. 16 million baguettes are consumed in France every single day. While other memecoins chase trends, \$BAGUETTE stands on centuries of cultural legacy.

Our mascot François Gangster — a baguette wearing a beret, marinière stripes and sunglasses — embodies the spirit of \$BAGUETTE: proud, bold, and unmistakably French. Like DOGE and PEPE, \$BAGUETTE is built for longevity. The difference: while DOGE is a dog and PEPE is a frog, \$BAGUETTE is civilization itself.

2. TOKENOMICS

Total Supply	1,000,000,000	Tax	0% — No buy/sell tax
Network	Solana	Liquidity	Burned at launch — locked forever
Platform	Pump.fun	Contract	Published at launch

Allocation	%	Tokens	Purpose
Public — Pump.fun	81%	810,000,000	Available at launch for public buyers
Events Airdrop Reserve	8%	80,000,000	Holder rewards & community events ■
Marketing & Partnerships	5%	50,000,000	Influencers, collabs, promotions ■
Initial Liquidity	3%	30,000,000	Self-funded launch liquidity pool

Emergency Reserve	2%	20,000,000	Critical situations only ■
Development	1%	10,000,000	Listings, tech, partnerships
TOTAL	100%	1,000,000,000	

3. WALLET DISTRIBUTION & TRANSPARENCY

All wallets are publicly disclosed at launch. Every allocation is verifiable on-chain. No hidden wallets, no unlisted reserves, no surprises. Full transparency guaranteed.

Wallet	Allocation	Tokens	Role
--------	------------	--------	------

\$BAGUETTE Creator	Creator 3% + Emergency 2%	50,000,000	Personal — vested release
\$BAGUETTE Reserve	Airdrop 8% + Marketing 5% + Dev 1%	140,000,000	Project — community & growth
\$BAGUETTE Liquidity	Initial Liquidity 3%	30,000,000	Sold at launch → funds pool
Pump.fun Bonding Curve	Public 81%	810,000,000	Open to all at launch

The Initial Liquidity wallet (3%) is the key innovation: instead of the creator spending personal funds, these tokens are sold at launch to self-fund the liquidity pool. The project is 100% self-financed from day one.

4. ALLOCATION DETAILS

78% — Public (Pump.fun)

The largest allocation goes directly to the public via the Pump.fun bonding curve. No pre-sale, no private rounds, no whitelists. Everyone has equal access at launch. Maximum decentralization, maximum community ownership.

8% — Events Airdrop Reserve ■

Reserved for community rewards and cultural event airdrops. Planned distributions: Bastille Day holders airdrop, milestone rewards (500/1,000/5,000 holders), World Cup France victories, community competitions. These tokens will never be sold on the market.

5% — Marketing & Partnerships ■

Used to onboard influencers and crypto KOLs — paid in \$BAGUETTE tokens, not cash. Our marketing partners become holders with skin in the game. Covers sponsored posts, meme campaigns, and French cultural event activations.

3% — Initial Liquidity

The self-financing mechanism. These 30 million tokens are sold at launch to fund the liquidity pool on Pump.fun. Eliminates the need for creator personal investment. LP tokens burned permanently after launch — liquidity locked forever.

3% — Creator Reward

Long-term creator compensation released progressively — never dumped. Creator interest is fully aligned with holders: the more \$BAGUETTE grows, the more the creator benefits. Wallet address published publicly at launch.

2% — Emergency Reserve ■

Locked safety net. Untouched under normal circumstances. Exists only for genuine emergencies: security issues, platform changes, or situations threatening the project. Any use announced publicly with full explanation.

1% — Development

Reserved for future growth: premium exchange listings, professional website, smart contract development, and strategic partnerships that require token compensation.
